

BIODIESEL

A PREMIUM QUALITY GREEN FUEL FOR A GREEN SOCIETY

In 2007, Patum Vegetable Oil (PVO) expanded its business into the renewable energy sector by establishing its first biodiesel plant. We are proud to support the Thai government's alternative fuel policy and to help reduce green house gas emissions from the use of fossil fuels that is a major cause of global warming. Currently, we are the largest and leading biodiesel producer in Thailand serving many major petroleum companies.

To assure premium quality of biodiesel, our highly experienced and skilled quality control team constantly monitors a quality in every step from raw material, in process, and finished products according to our high standard quality control system. Moreover, our lab facilities are equipped with advanced equipments to carry out all necessary and critical parameters to assure that our biodiesel is safe and the quality is complied with both local and international standards e.g. ASTM D6751, and EN14214.

APPLICATION

Biodiesel can be combined with petroleum diesel fuel into various blending levels.

PRODUCT

Fatty Acid
Methyl Ester
(FAME)

Palm Methyl
Ester (PME)

Biodiesel
(B100)

WHY PVO'S BIODIESEL ?

Premium quality The Company emphasizes biodiesel quality both physical, and chemical properties under intense quality control practices with advanced lab equipments and skilled quality control staffs.

Consistency in quality With the experience of supplying over 4 billion liters of biodiesel to high-standard petroleum companies, quality consistency of our biodiesel has indeed been proven.

Reliability of supply With Company's large-scaled production, over 1,000,000 tons per annum, supply continuity and reliability can be ensured.

Sustainability As the first RSPO member and SCCS certified in Thailand, the Company has strongly supported and promoted Thai oil palm and palm oil industry towards sustainability through various activities.

QUALITY FOR LIFE

Patum Vegetable Oil (PVO) was established in 1975 and has become a market leader in the cooking oil, biodiesel and refined glycerine sectors in Thailand. We focus on providing premium products by using advanced technology, modern process facilities and world class quality management. We offer our products in a variety of containers and specifications to meet our customers' satisfactions.

HIGH INDUSTRIAL STANDARDS

Patum Vegetable Oil (PVO) continually improves quality through the Integrated Management System. This system covers the quality assurance of our products and services as well as encompassing social and environment-friendly measures. Our company has long been awarded certification for meeting international standards.
